# WELCOME ADDRESS

## FROM THE DEVELOPERS

Welcome to the first decentralized AI platform that aims to democratize access to advanced language processing tools.

As developers, we're passionate about the potential of AI to transform the way we communicate and interact with each other, but we also recognize that there are some challenges that need to be addressed.

One of the key issues we're tackling at VHS is content restrictions. As you may know, many language processing tools are limited by various types of restrictions, ranging from political correctness filters to censorship and content moderation. While these restrictions may be well-intentioned, they can actually be detrimental to the development of AI tools in several ways.

First, content restrictions can limit the scope and diversity of training data that AI models are exposed to, which in turn can limit their ability to generalize and adapt to new contexts. Second, content restrictions can introduce bias and inaccuracies into the training data, which can lead to suboptimal or even harmful results. Finally, content restrictions can stifle creativity and innovation by imposing arbitrary limits on the range of topics and ideas that can be explored.

# ANALYSIS OF THE AI MARKET

## ECONOMIC GROWTH IN 2022

The AI market has been growing rapidly over the past few years, and this trend is expected to continue in 2022. According to a report by MarketsandMarkets, the global AI market size is expected to grow from \$58.3 billion in 2021 to \$309.6 billion by 2026, at a Compound Annual Growth Rate (CAGR) of 39.7% during the forecast period.

One of the key drivers of the AI market growth is the increasing demand for AI-powered solutions across various industries, including healthcare, finance, retail, and manufacturing. AI technologies such as natural language processing, computer vision, and machine learning are being used to automate tasks, improve decision-making, and create new products and services.

Another factor that is contributing to the growth of the AI market is the increasing availability of data and computing power. With the rise of the Internet of Things (IoT) and the proliferation of digital devices, there is a massive amount of data being generated every day.

---

"Artificial intelligence will be the most significant technology of the next decade, with the potential to solve humanity's most pressing problems, but also to cause immense harm if not developed with care." - Naval Ravikant.

## AI AND BLOCKCHAIN

AI technologies are being used to analyze and extract insights from this data, which can lead to new opportunities for businesses and organizations.

## THE COMING YEARS

There are also some challenges and concerns associated with the growth of the AI market. One of the key issues is the potential for AI to be biased or to reinforce existing inequalities. As AI technologies become more integrated into various systems and processes, it is important to ensure that they are developed and deployed in an ethical and responsible manner.

THE  
FOUNDATIONAL  
REVOLUTIONARY  
ASPECT OF AI  
WHEN APPLIED TO  
BLOCKCHAIN IS  
THE ABILITY TO  
DECENTRALIZE  
TRAINING DATA.

# PRODUCTS

## HIGHLIGHTED

Blockchain technology can be used to create a decentralized platform for AI development, where anyone can contribute to the training data and experiment with new models. By leveraging the power of distributed consensus, blockchain can enable more transparent and democratic AI systems that are less susceptible to bias and manipulation.

The industry 4.0 applications of AI include automation, predictive maintenance, quality control, and smart production. VHS will enable secure and efficient data sharing, creating more transparent and democratic systems, and incentivizing collaboration and innovation through token economies. This can unlock new opportunities for businesses and organizations, and accelerate the transition towards Industry 4.0.

AI AND  
BLOCKCHAIN  
CAN BE USED  
TOGETHER  
TO CREATE  
INNOVATIVE  
APPLICATIONS  
THAT IMPROVE  
THE EFFICIENCY,  
SECURITY, AND  
TRANSPARENCY OF  
VARIOUS SYSTEMS  
AND PROCESSES.  
APPLICATIONS  
CAN INCLUDE  
DECENTRALIZED  
AI PLATFORMS,  
DATA PRIVACY  
AND SECURITY,  
DIGITAL  
IDENTITY,  
SUPPLY CHAIN  
MANAGEMENT, AND  
FRAUD DETECTION  
AND PREVENTION.

## 2023 RELEASES

### Q1: AWARENESS

Raising awareness of the importance of reducing censorship and training bias to create more transparent, unbiased, and ethical systems to benefit everyone.

### Q2: TRAINING DAPP

Our revolutionary tool enables anyone to contribute to the training of AI models in a decentralized and transparent manner.

### Q3: PARTNERSHIPS

We are actively seeking partnerships with like-minded organizations and individuals who share our vision of a more decentralized, and secure future.

### Q4: INDUSTRY 4.0

From automation and predictive maintenance to quality control and smart production, we're committed to driving this transition.

## KEY PERFORMANCE INDICATORS

A well-structured short-term project should have clear KPIs (Key Performance Indicators) defined at the outset, to ensure that progress can be tracked and project goals achieved.

 **70%**

Daily active users (DAUs) of the OldAI platform, to track engagement and growth.

 **40%**

Total transaction volume on the VHS blockchain, to measure adoption and usage of the cryptocurrency.

 **80%**

Number of partnerships established with other companies or organizations, to assess the impact

 **30%**

Average transaction fees for OldAI, to measure the platform's efficiency and cost-effectiveness compared to cryptocurrencies.

These KPIs will be made available for review to all users of the platform to create an open and transparent reporting of the project's progress.

# COMMUNITY RULES

## HOW WE DEFINE RESPECTFUL ENGAGEMENT

All members of the community are expected to treat each other with kindness, consideration, and

This means refraining from personal attacks, hate speech, or other forms of discriminatory behavior, and engaging in constructive and respectful dialogue.

The community is a space for learning and growth, and all members are encouraged to listen to each other's perspectives, experiences, and ideas

This means being open-minded, curious, and willing to learn from others, even if you don't always agree with their viewpoints. It also means being willing to engage in productive discussions and debates, while maintaining a respectful and civil tone.

To maintain a productive and engaging community, all members are encouraged to stay on topic and avoid spamming or posting irrelevant content

This means focusing on the relevant topics and themes of the community and contributing to the ongoing discussions in a thoughtful and constructive manner. Off-topic or irrelevant content can be distracting and take away from the value of the community for everyone.

---

"Technology is nothing. What's important is that you have a faith in people, that they're basically good and smart, and if you give them tools, they'll do wonderful things with them." - Steve Jobs

# THE TEAM

## THE DREAM TEAM

Introducing our team of industry veterans, a powerhouse of brilliant minds with years of experience in their respective fields. With their wealth of knowledge and unparalleled expertise, they're pushing the boundaries of what's possible in the world of AI and blockchain, and creating groundbreaking solutions that have the power to change the world.
